BOUNCE

remix any song on your phone

Creative tools blur the lines between a creator and a consumer

TEXT	PHOTOS	VIDEO	MUSIC
anybody can create their thoughts	anybody can create a photo	anybody can create a video	anybody can create a song

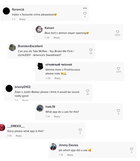
Similar to text, photo, and video - music is a participatory medium that enables self-expression.
But music creation is still not easy.

Current music creation tools are not accessible

takes 6 months to learn and costs between $300-$800

Yet, so many are interested.

Many revert to using non-music apps to make remixes of songs because they're easier.



Without the capability to create themselves, people plead professionals to do so for them

takes less than 5 minutes to make a song on Bounce

INTERNET IS YOUR LIBRARY

Bounce let's you upload any sound from anywhere. If from trending songs to 90s throwbacks, or even your own voice, you can access it all.

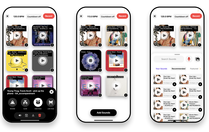
Best Match

MIX ANYTHING

Bounce makes pairing sounds easy. All sounds are algorithmically processed to sound good together.

TEMPLATED EFFECTS

Effects that are built based on popular trends like slow-mo reverb, mashups, twisting vocals, etc.



Bounce (current iteration) makes music creation dead simple and is built for everyone, not just musicians.

Bounce gets better everytime a new song is made

Every sound uploaded to Bounce gets added to a global sound library that can be accessed by other creators (w their permission) - this creates a unique content catalogue of sounds that can't be found anywhere else. Resulting in strong content based network effects.

People are already begging us to release this.

We want to become default tool for the next generation of audio and music creators
