BOUNCE

remix any song on your phone

Creative tools blur the lines between a creator and a consumer

TEXT	PHOTOS	VIDEO	MUSIC
anybody can share their thoughts	anybody can share a photo	anybody can create a video	anybody can create a song

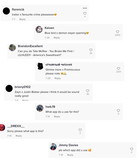
Similar to text, photo, and video - music is a participatory medium that enables self-expression.
But music creation is still not easy.

Current music creation tools are not accessible

takes 6 months to learn and costs between $300-$800

Yet, so many are interested.

Many resort to using non-music apps to make remixes of songs because they're easier.



Without the capability to create themselves, people plead professionals to do so for them

Bounce is enabling the future of music.

INTERNET IS YOUR LIBRARY

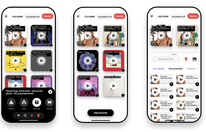
Bounce let's you upload any sound from anywhere. From trending songs to 90s throwbacks, or even your own voice, you can access to it all.

MIX ANYTHING

Bounce makes pairing sounds easy. All sounds are algorithmically processed to sound good together.

LAYER EFFECTS

You can easily layer effects on top of your sounds in real-time, isolate between vocals and instrumentals or find the perfect loop within a song.



Bounce (current iteration) makes music creation dead simple and is built for everyone, not just musicians.

Bounce gets better everytime a new song is made
